Applicant(s)

NEWMAN ET AL.

Examiner

Mike Chambers

Art Unit

3711

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 24 July 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-7, 20-25 and 27-39 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-7, 20-25 and 27-39 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 20-25, and 27-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swift (0722927). Swift discloses the elements of claim 1,

a forward striking face; and a rearward surface, opposite the forward striking face; wherein the forward striking face is configured to include an engineered texture having a substantially planar recessed surface and a prescribed, regular pattern of discrete geometric shapes projecting forward from the recessed surface, wherein the geometric shapes are spaced apart from each other along the recessed surface by at least 0.1 mm and each geometric shape is solid and has a volume of less than 0.0007 mm<sup>3</sup> (fig 1). The specification provides no unexpected or surprising results in using the dimensions cited, therefore these limitations are considered design choices. It would have been obvious to one of ordinary skill in the art to have selected an appropriate dimension for the grooves, planar surfaces, and volume of the geometric shape based on manufacturing and marketing decisions.

As to claims 2-5 : Swift discloses a pattern of geometric shapes (fig 1). The specification provides no unexpected or surprising results in using the dimensions cited, therefore these limitations are considered design choices. It would have been obvious to

one of ordinary skill in the art to have selected an appropriate dimension for the grooves, planar surfaces, and volume of the geometric shape based on manufacturing and marketing decisions.

As to claim 6 : Swift discloses same sized geometric shapes (fig 1).

As to claim 7 : Swift discloses a plurality of grooves (fig 1).

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Swift as applied to claim 1 above, and further in view of Official Notice taken in the prior office action . Official Notice was taken that it is well known in the art to use welding to attach the members. It would have been obvious to one of ordinary skill in the art to have selected any one of several equivalent attachment means based on cost and design considerations. Official notice is also taken that the use of metal clubs is well known in the art and it would be obvious to utilize a metal head in order to present the consumer with a typical head.

As to claim 21 : Swift discloses an integral front and sole portion (fig 1,4).

Claims 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swift as applied to claim 1 above, and further in view of Official Notice. Official Notice was taken in the prior office action that the loft angles cited are well known in the art. It would have been obvious to one of ordinary skill in the art to have selected any one of several equivalent lofts based on cost and design considerations and to increase the player satisfaction with the device.

As to claim 25 : Swift discloses a first plurality of shapes (top row) and a second plurality of shapes (2<sup>nd</sup> row) that are adjacent (fig 1).

As to claim 27 : Swift discloses geometric shapes (fig 1). The specification provides no unexpected or surprising results in having more than one orientation. It would have been obvious to one of ordinary skill in the art to have selected an appropriate design and orientation based on cost and design considerations and to increase the player satisfaction with the device.

As to claims 29-39: See claim 1-4, 6,7,20-25, 27 and 28 rejections. These claims are merely slight variations of the previous claims and represent the same invention.

Also,

Claims 1-7,20-25, and 27-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis (0749174). Davis discloses the elements of claim 1,

a forward striking face; and a rearward surface, opposite the forward striking face; wherein the forward striking face is configured to include an engineered texture having a substantially planer recessed surface and a prescribed, regular pattern of discrete geometric shapes projecting forward from the recessed surface, wherein the geometric shapes are spaced apart from each other along the recessed surface by at least 0.1 mm and that each geometric shape is solid and has a volume of leas than 0.0007 mm<sup>3</sup> (fig 1). The specification provides no unexpected or surprising results in using the dimensions cited, therefore these limitations are considered design choices. It would have been obvious to one of ordinary skill in the art to have selected an appropriate dimension for the grooves, planar surfaces, and volume of the geometric shape based on manufacturing and marketing decisions.

As to claims 2-5 : Davis discloses a pattern of geometric shapes (fig 1). The specification provides no unexpected or surprising results in using the dimensions cited; therefore these limitations are considered design choices. It would have been obvious to one of ordinary skill in the art to have selected an appropriate dimension for the grooves, planar surfaces, and volume of the geometric shape based on manufacturing and marketing decisions.

As to claim 6 : Davis discloses the same sized geometric shapes (fig 1,2).

As to claim 7 : Davis discloses a plurality of grooves (fig 1,2).

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Davis as applied to claim 1 above, and further in view of Official Notice taken in the prior office action . Official Notice was taken that it is well known in the art to use welding to attach the members. It would have been obvious to one of ordinary skill in the art to have selected any one of several equivalent attachment means based on cost and design considerations. Official notice is also taken that the use of metal clubs is well known in the art and it would be obvious to utilize a metal head in order to present the consumer with a typical head.

As to claim 21 : Davis discloses an integral front and sole portion (fig 1,2).

Claims 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis as applied to claim 1 above, and further in view of Official Notice. Official Notice was taken in the prior office action that the loft angles cited are well known in the art. It would have been obvious to one of ordinary skill in the art to have selected any one of several equivalent lofts based on cost and design considerations and to increase the player satisfaction with the device.

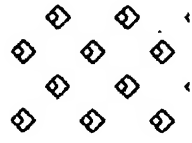

As to claim 25 : Davis discloses a first plurality of shapes (top row) and a second plurality of shapes (2<sup>nd</sup> row) that are adjacent (fig 1).

As to claim 27 : Davis discloses geometric shapes (fig 1). The specification provides no unexpected results in having more than one orientation. It would have been obvious to one of ordinary skill in the art to have selected an appropriate design and orientation based on cost and design considerations and to increase the player satisfaction with the device.

As to claims 29-39: See claim 1-4, 6,7,20-25, 27 and 28 rejections. These claims are merely slight variations of the previous claims and represent the same invention.

### ***Response to Arguments***

Applicant's arguments filed 7/24/06 have been fully considered but they are not persuasive. While the examiner believes there is novelty in the specification and drawings, the existing claim language fails to clearly define this novelty. For example, a

club having this type of a face, on the surface appears to be novel . But the existing claim language merely calls for geometric shapes that are spaced apart by

at least 0.1mm. Utilizing this limitation, Davis-749,174 and Swift-722,927 are relevant prior art. The instant specification makes it clear that any one of several

Art Unit: 3711

equivalent manufacturing methods can be used to form the head

[0034] Various methods have been investigated for creating the discrete, geometric shapes 16 having the properties described above. These methods include laser surface machining, or laser cutting, chemical etching, and precision micro-saw-cutting. ).

Although most of the methods disclosed were not available when the Davis and Swift patents were issued, one of ordinary skill in the art would have been aware of them since they would have kept abreast of various manufacturing methods. The only structural requirements of the existing claim language calls for discrete, geometric shapes projecting forward from the recessed surface. Both Davis and Swift have a

planar recessed surface that the geometric projections extend from

The other limitations in the existing claim language are drawn towards how the structures are formed/used. This is considered a product by process type of claim, which does not read on the structure of the claim. Therefore this is not considered a structural limitation. If the design of the club face is believed unique, the applicant may wish to consider a design patent to capture its novelty. Unfortunately the existing claim language still reads on the cited art.

### **Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mike Chambers whose telephone number is 571-272-4407. The examiner can normally be reached on Mon-Fri 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene Kim can be reached on 571-272-4463. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
